<ul style="list-style-type: none">Created a tool for managing the company's backup data.Developed a tool to improve the efficiency of the HR department by automating email sending,	

PROJECTS

FORM BUILDING PLAFORM

Built a platform for creating forms with drag-and-drop functionality and receiving form submissions. The project was developed using Next.js, Prisma as the ORM, and PostgreSQL as the database.

ONLINE STORE WITH A DASHBAOARD

An online e-commerce store with a dashboard using Next.js as a fullstack framework, Drizzle as the ORM, PostgreSQL as the database, and PostHog for analytics. The project includes features for product management, order management, promotions management, and coupon management.

IMAGE TO WEBP CONVERTER

A utility website for converting images to Webp format without a dedicated backend server; instead, it uses WebAssembly for processing.

MARKETING AGENCY WEBSITE

I developed a website for a marketing agency using Next.js and Strapi as the CMS. The website follows SEO best practices to practices for better visibility.
